

I pay for XM Radio Service and do not want the NAB lobbyists to dictate my personal listening choices. I understand they are upset about "localized" content but in fact the content they are upset about is available across the US which is abiding by the terms of the agreements as I understand it. That content is the Traffic and Weather. I also listen to other cities weather and traffic out of interest from time to time. I respectfully urge the FCC to reject the petition of the The National Association of Broadcasters "04-160".

Respectfully,
Brett Autrey
